

Managing Medication Errors

IN LONG TERM CARE

BY: SAUL GREENBERGER, L.N.H.A.
FOUNDER, PHARMSCRIPT PHARMACY

Managing Medication Errors: Saul Greenberger

Med Errors- Outline

- Types of Errors
- Contributing Factors
- Why is LTC more prone?
- Pharmacy – A Key Component
- A parallel industry
- How can they be avoided?
- Quality Improvement
- Criminalization- An alarming trend

Managing Medication Errors: Saul Greenberger

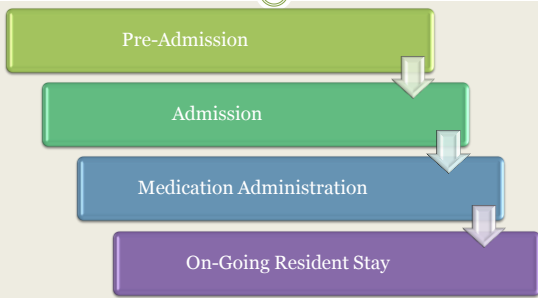

Med Error - Definition

Any **preventable event** that may cause or lead to inappropriate medication use or patient harm

National Coordinating Council for
Medication Error Reporting and Prevention

Managing Medication Errors: Saul Greenberger

Timeline of "Preventable Events"

Managing Medication Errors: Saul Greenberger

Types of Errors

**MECHANICAL VS.
HUMAN**

Managing Medication Errors: Saul Greenberger

Human Error - Definition

Human error is any human action or lack thereof that exceeds the tolerances defined by the system with which the human interacts.

D.K. Lorenzo, *A Manager's Guide to Reducing Human Errors*

Managing Medication Errors: Saul Greenberger

Unintentional errors

Actions committed or omitted with no prior thought

- misreading an order
- bumping the wrong switch
- forgetting to properly set the dose on an X-ray device
- usually thought of as accidents

Managing Medication Errors: Saul Greenberger

Intentional errors

Actions deliberately committed or omitted because staff believe their actions are correct or better than the prescribed actions

- Shortcuts
- “Improved” methods
- Don’t always result in harm

Managing Medication Errors: Saul Greenberger

The Swiss Cheese Organizational Model

Developed by James Reason, University of Manchester

- A series of events which must occur in a specific order and manner for an accident to occur
- Holes are opportunities for failure
- Each slice is another layer of the system

Managing Medication Errors: Saul Greenberger

Contributing Factors

WHAT MAKES THEM HAPPEN?

Managing Medication Errors: Saul Greenberger

Performance Shaping Factors (PSF)

Anything that affects staffs' performance of a task

Managing Medication Errors: Saul Greenberger

Internal PSFs

Individual skills, abilities, attitudes and other characteristics staff bring to the job

- Experience
- Knowledge of standards
- Intelligence
- Motivation/work attitude
- Personality
- Emotional state
- Physical condition/health

Managing Medication Errors: Saul Greenberger

External PSFs

Influence the environment in which tasks are performed

- Facility Layout
- Temperature, lighting, noise
- Shift rotation/Staffing levels
- Procedures: written or not written
- Frequency/repetitiveness

Managing Medication Errors: Saul Greenberger

Stressors

- Heavy task load
- Threats of failure or loss of job
- Degrading or meaningless work
- Long, uneventful vigilance periods
- Distractions
- Fatigue
- Lack of rewards, recognition or benefits

Managing Medication Errors: Saul Greenberger

Long Term Care

EVEN MORE ERRORS

Managing Medication Errors: Saul Greenberger

Concerning Statistics

- 7,000 yearly deaths due to sloppy handwriting
- 106,000 yearly deaths from adverse drug reaction
- Only 6% of ALL adverse drug reactions are properly identified
- 800,000 preventable drug-related errors occur in long-term care settings

Managing Medication Errors: Saul Greenberger

Concerning Statistics (Cont.)

Managing Medication Errors: Saul Greenberger

Why is LTC More Error Prone?

Managing Medication Errors: Saul Greenberger

Additional Factors

- Transition from one care setting to another
 - ✦ Prescribing or transcription errors
 - ✦ Medicare Part D
- Time Constraints/ Understaffed
- Inadequate pharmacological knowledge
- Failure to comply or lack of procedures

Managing Medication Errors: Saul Greenberger

PHARMACY

A KEY COMPONENT

Managing Medication Errors: Saul Greenberger

The Fill Process - Oversimplified

Managing Medication Errors: Saul Greenberger

Pharmacy Step 1 - Code

PROCEDURE:
Receive fax → Enter data
RPH1 Check → Print Label

QUALITY ASSURANCE:
Missing Orders → Skips
Transcription → Allergies

Managing Medication Errors: Saul Greenberger

Pharmacy Step 2 - Fill

PROCEDURE:
Pre-Pack → Affix Label → RPH2 Check

QUALITY ASSURANCE:
Mismatch → Skips

Pharmacy Step 3 - Bag

PROCEDURE

- Package Totes
- Create Manifests
- On Time Delivery

QUALITY ASSURANCE

- Mixed Totes
- Skips

Managing Medication Errors: Saul Greenberger

A Parallel Industry

ERRORS FROM ANOTHER PERSPECTIVE

Managing Medication Errors: Saul Greenberger

Managing Medication Errors: Saul Greenberger

Transportation Facts

Odds of fatal accident

- Airline = 1/ 7,000,000
- Train = 1/ 1,000,000
- Driving = 1/14,000

Managing Medication Errors: Saul Greenberger

General Odds of Death

- Cardiovascular disease: 1 in 2
- Smoking : 1 in 600
- Bicycle accident: 1 in 88,000
- Tornado: 1 in 450,000
- Lightning: 1 in 1.9 million
- Bee sting: 1 in 5.5 million

Managing Medication Errors: Saul Greenberger

Airline Strengths

- Minimized distractions
- Checklist centered/ Verbalization
- Set up to avoid work fatigue
- Unprecedented training routines
- Thorough investigation after even MINOR accident

Managing Medication Errors: Saul Greenberger

Delta Flight 1141 : August 31, 1988

Managing Medication Errors: Saul Greenberger

How Can We Control Med Errors?

APPLIED LEARNING

Managing Medication Errors: Saul Greenberger

Minimize Distractions

- Impossible to AVOID but can be CONTROLLED
- Cell Phones
- Other interruptions
- **Restart individual med pass if interrupted**

Managing Medication Errors: Saul Greenberger

Checklists

- Keep them brief
- Easy to understand
- Make them available
- Wide range of scenarios
- Verbalizing

Managing Medication Errors: Saul Greenberger

Work Fatigue

- Shortage of staff
- Pool of per diem staff
- Look out for signs of extreme fatigue
- Keep an eye out for talent

Managing Medication Errors: Saul Greenberger

Training

- Re-examine orientation procedures
- On-going competency exams
- Perform routine drills
- Real life testing

Managing Medication Errors: Saul Greenberger

Investigate

- Internal poc's
- Take A/I reports more seriously
- Look for systemic breakdowns
- Identify training weaknesses
- Share lessons with other facilities

Managing Medication Errors: Saul Greenberger

eMars

Pick Chart

Managing Medication Errors: Saul Greenberger

National Quality Forum (NQF)

- Setting priorities and goals for performance improvement
- Creating standards for measuring and reporting
- Education and outreach

Managing Medication Errors: Saul Greenberger

Measuring

Cornerstone of any quality improvement program

- Can't change what you can't measure
- Gives true scope of any problem area
- Lets you know when you've reached the goal
- Lets you compare to others

Managing Medication Errors: Saul Greenberger

Managing Medication Errors: Saul Greenberger

“Vulnerable Adult Abuse”

Any knowing, intentional, or negligent act by a caregiver or any other person that causes harm or a serious risk of harm to a vulnerable adult.

Washington State Office of the Attorney General

Managing Medication Errors: Saul Greenberger

Who is a Vulnerable Adult ?

One who is unable to independently provide for their own basic necessities of life by virtue of:

- Age
- Physical injury
- Disability
- Disease
- Emotional or developmental disorders

Managing Medication Errors: Saul Greenberger

Death of Michael Jackson
